Objective

Aspiring software engineer and web developer with hands-on experience in creating responsive websites and interactive applications using React, JavaScript, and C#. Passionate about building user-friendly digital experiences.

Technical Skills

- **Languages:** JavaScript (ES6+), C#, HTML5, CSS3
- **Frameworks & Libraries:** React, LINQ, Windows Forms
- **Tools:** Git/GitHub, Visual Studio, VS Code
- **Databases:** JSON, basic SQL
- **Other:** Version control, responsive design, teamwork

Projects

- **Sukoon – SPA Website (React)**
Built a single-page application with React featuring responsive UI and clean navigation for a wellness theme.
- **Pokémon Finder (React + PokéAPI)**
Developed a web app with search functionality, API integration, and localStorage-based favorites.
- **Car Finder (JavaScript + JSON)**
Designed a dynamic website that allows users to search and filter cars from JSON data using vanilla JavaScript.

Experience

- **Social Media Executive, CCSAI Engineering Club** Toronto, ON | Feb 2025 – Present
Managed club's social media presence, promoted events, and engaged with a diverse student community.
- Software Projects (Academic & Personal)

Sukoon – SPA Website (React): Built a responsive single-page application with a clean UI and smooth navigation for a wellness-themed platform.

Pokémon Finder (React + PokéAPI): Developed an interactive web app with search functionality, API integration, and a favorites system using localStorage.

Car Finder (JavaScript + JSON): Created a dynamic website enabling users to filter and search cars from JSON data.

Fraction Calculator (C# Windows Forms): Designed and implemented a GUI-based calculator with operator overloading and input validation for fractional arithmetic.

Education

Diploma in Software Engineering Technology

Centennial College, Toronto, ON
